

- Data collection and display system (Collect a data item periodically (ex. temperature, value of stock), by any means (ex, type in, read file, get online), present the information in tabular/graphical form, store the information for later recall)
- Read an html file and count the number of tags of each type, (ex, 1 <html>, 1 , 2 ...), flag missing end tags and pretty format with configurable indentation spaces (ex. 0 spaces for <html>, 2 spaces for <body>...)
- Keyboard piano, each key on a row shall produce a tone corresponding to a piano key. Program can store a file of keys/tones produced when a particular key or key combination (ex. PF10, Ctrl+R) is pressed to start and stop the file 'recording'.
